EDUCATION

Texas Christian University

Bachelor of Arts in Computer Science, Minor in Mathematics

Fort Worth, TX

Aug. 2023 – Present

EXPERIENCE

Application Developer

June 2026 – Present

Texas Parks and Wildlife Department

Austin, TX

- Designed and developed a full-stack time-off request application using Power Apps, Power Automate, and SharePoint Lists, consolidating the request, review, and approval process into a single centralized tool
- Built automated approval workflows with Power Automate that route requests to managers and sync approved time off directly to a shared calendar, eliminating manual scheduling steps
- Authored a process flow document mapping the end-to-end application logic, and a UI wireframe document outlining the app's interface, ensuring clarity for stakeholders before development

PROJECTS

CUDA Image Processing | *CUDA, C*

Feb. 2026 - Mar. 2026

- Developed GPU kernels to preform image filter operations including blur, sharpen, and sobel edge detection
- Implemented a verification mode that processes images on both GPU and CPU to verify correctness
- Developed a CLI that supports image filters, blur radius, and verification mode
- Used event timing to provide performance data

C++ Shell | *C++*

Jan. 2026 - Feb. 2026

- Engineered a fully-functional Unix shell in C++ supporting interactive and batch execution modes.
- Built parallel command execution with the & operator
- Implemented I/O redirection (>) using open() + dup2() to redirect both stdout and stderr to a file.

TV Database | *Python, mySQL*

Oct. 2025 - Dec. 2025

- Designed and implemented a relational MySQL database of 10,000+ TV shows across 6 tables
- Applied database normalization (up to 3NF) to eliminate redundancy in genre and country data
- Bridged database to a Python GUI, supporting full CRUD functionality for intuitive data management

Movie Recommendations | *Java, Maven, Swing, Web Scraping*

Dec. 2024 - Jan. 2025

- Developed a desktop application powered by user data from Letterboxd to algorithmically recommend movies
- Uses JSoup to seamlessly pull user and film data directly from Letterboxd
- Built into a JAR using Maven and then an .exe installer for easy installation
- Crafted a multi-page Swing GUI incorporating filter selection, flexible viewing modes, and help page

TECHNICAL SKILLS

Languages: Java, Python, C/C++, mySQL, JavaScript, HTML/CSS

Frameworks: Node.js, Vue, Tailwind, Springboot

Developer Tools: Git, Docker, Maven, VS Code, IntelliJ, Power Apps, Power Automate

Libraries: CuPy, Thrust, Selenium

COMMUNITY INVOLVEMENT AND VOLUNTEERING

Furry Friendly Animal Rescue

Shelter Volunteer

Kaufman, TX

Aug. 2023 – Present

Honors College Community Service

Volunteer

Fort Worth, TX

Aug. 2025 – Present

Photographer

Volunteer with various clubs to provide photography

Fort Worth, TX

Aug. 2023 – Present
